Gaskets

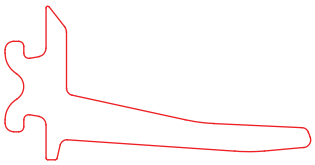

High-Performance Gaskets for uPVC Windows and Doors

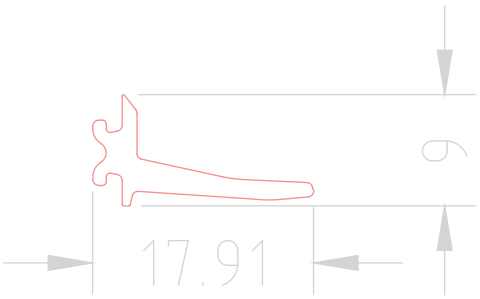

Side gasket

Middle gasket

Gaskets
Our uPVC profiles are equipped with premium-quality gaskets designed to deliver exceptional sealing performance, durability, and energy efficiency. These gaskets are an integral part of our window and door systems, ensuring optimal insulation and long-lasting protection against the elements.

Superior Sealing
Our gaskets provide a tight, reliable seal that prevents air, water, and dust infiltration, enhancing the thermal and acoustic insulation of your windows and doors.

Durable Material
Made from high-grade EPDM or TPE rubber, our gaskets are resistant to UV radiation, ozone, and extreme weather conditions, ensuring long-term performance without cracking or shrinking.

Flexible Design
Engineered for a perfect fit within our uPVC profiles, the gaskets maintain their elasticity and shape over time, even with frequent opening and closing.

Energy Efficiency
By minimizing heat loss and drafts, our gasket systems contribute to improved energy efficiency and reduced heating and cooling costs.

Why to choose our products?

Our PVC window and door systems are manufactured using advanced technology and provide an excellent level of acoustic and thermal insulation, achieving the highest quality standards available.

- Environment Friendly
- Easy Installation
- Cost Effective
- Noise Reduction
- Can be recycled
- Less Maintenance
- Fire Retardant
- Long life
- Thermal Insulation
- Modern design

Premium uPVC profiles
Created from high-quality raw materials

Innovation
Enhanced durability and energy efficiency for construction needs

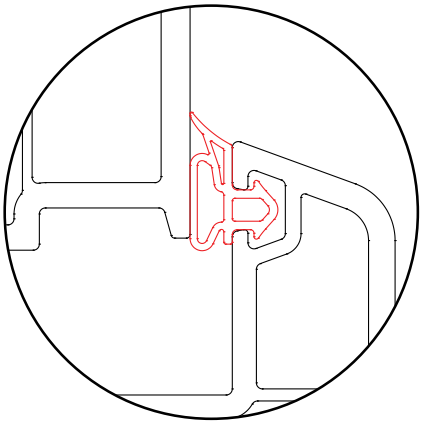

Reliability
Our uPVC profiles are designed for unmatched reliability
